

CLEAN AIR FOR HEALTHY LIVING

Client References

“I was referred to the Indoor Air Alliance by my Naturopath who told me that their services were available to check the quality of the air in my home.

I believe they thoroughly understand what is needed to check indoor air quality, identify any issues and to correct any issues that are identified. They are honest, reliable, do excellent work and I would recommend their services to anyone.”

Stephanie H., Denver CO

“We really appreciate all your time and effort you spent with us testing and going over the information so that we would understand and know what to do to correct the problems you found in our home.

Thanks to you we are back in our home for the first time in 8 days and feeling well and breathing much cleaner air.

I would be happy to talk to anyone and tell them what a great, thorough and professional job the Indoor Air Alliance does in helping people with indoor air problems.” ***Lynn Y., Aurora CO***

CLEAN AIR FOR HEALTHY LIVING

“You have been very good at communicating and returning phone calls, scheduling and showing up when you're supposed to and producing a quality report in a timely and professional way. Thanks for all your help.”

***Bruce B.
Winter Park, CO***

“Thank you so much for the very thorough home air quality/mold inspections and testing. I feel so much better knowing that our home is basically in good shape and what steps I can take to improve my asthma and allergy symptoms. The Indoor Air Alliance alleviated my worst fear and confirmed something else I thought was part of my problem. The educational component of the inspection and testing process and the follow up report have made me an informed consumer that can make intelligent choices on the best way to proceed. Even my husband, the ultimate skeptic, was impressed by your final report presentation complete with graphs, pictures, and information that put everything into perspective. Thank you again.”

CLEAN AIR FOR HEALTHY LIVING

“The work that Indoor Air Alliance does is excellent. From the promptness of their response to making a home visit to their expertise in the area of indoor air quality I highly recommend them. And they really care about their clients their quality of life”

Deb H, Windsor CO

“My wife has been suffering from allergies associated with VOCs in our house. We referred to the Indoor Air Alliance by our doctor and proceeded to ask for their evaluation of our home environment. IAA did a thorough evaluation of the air quality of our house and found the VOC level to be higher than it should be. Best of all, they researched and recommended a cost effective way to control our VOC problem, by installing an air purifier. They also arranged for our HVAC service company to provide a better air filtration capability.

Our air cleaner has only been used for a short time and the air filtration system has yet not been installed, but the air in our house already feels much more fresh.

We have found the IAA staff to be very personable, professional and in our case delivered what they promised.”
